## Why Study in Public Health

**Public health** is focused on prevention rather than the treatment of disease. It examines the overall health of a population with the aim of developing strategies to promote and protect health. Through course work and hands-on experience, the public health major at RTM-AKTU will provide you with the skills and tools needed to prevent disease/injury and to promote, and protect the health and well-being of populations across the globe. The core of our work in public health is to take steps to prevent chronic and infectious disease before it occurs. Join us to be part of this exciting and rapidly expanding field and have a positive influence on your world!

**The Department of Applied Health and Nutrition of RTM-AKTU** aims to produce public health professionals who would be an adaptive lifelong learner, passionate professional and enthusiastic. Our students will be unique because they have the freedom to develop a career of their own choice. The interdisciplinary learning technology will prepare our students to contribute to applied health and nutrition, leadership and research excellence.

After successful completion of 18 months MPH, you will graduate with knowledge of globally significant fields including health services research, ageing, mental health, global health, essential service delivery, nutrition, chronic disease epidemiology, environment, climate and health, infectious disease epidemiology and modelling, and society, culture and health.
