

The students of the Department of Electrical and Electronic Engineering, **RTM Al Kabir Technical University, Sylhet**, have recently completed a two-week long industrial training on “**Industrial Technology on Electrical Engineering & Instrumentation**” at the **Training Institute for Chemical Industries (TICI), Polash, Narsingdi**, held from **9th – 21st August 2025**. TICI is well known for its intensive programs, expert instructors, and state-of-the-art laboratories where students from across the country gain real-world knowledge to complement their academic learning.

This was a significant participation of EEE students from RTM-AKTU in TICI’s specialized program, which is designed to provide hands-on industrial experience and managerial insights. The training included comprehensive sessions on electrical safety, testing and measurement, power systems, instrumentation, industrial automation, and plant operation, combining both theoretical classes and practical laboratory exercises along with regular assessments.

At the **Closing & Certificate Awarding Ceremony**, students were honored in the presence of **Chief Guest**, Mr. A.K.M. Arif Hossain, Executive Director, TICI, and **Chair**, Mr. Md. Shahjahan Ali, Head of Department (OPT), TICI, alongside **Special Guests**—Mr. Md. Eyakub Ali, Lecturer, RTM-AKTU; Ms. Fatema Khatun, Assistant Professor, GSTU; and Mr. S. M. Fazle Rabbi, Lecturer, GSTU—whose presence made the occasion remarkable.

The performance of our students throughout the training was highly commendable, earning praise from the TICI authority for their dedication and achievements. The completion of this program has enriched their technical competence and practical knowledge, which will serve as a valuable asset in their professional careers and future contributions to the nation’s industrial sector.
